Docket No. 50-155

Consumers Power Company  
Big Rock Point  
ATTN: D. P. Hoffman,  
Plant Superintendent  
Charlevoix, MI 49720

Gentlemen:

A spiked air particulate filter is being forwarded to your chemistry laboratory under separate cover for analysis as discussed with onsite Consumers Power personnel during the April 29, 1982, exit interview. Big Rock Point's analytical results will be compared with those of the NRC; this comparison will be an addendum to I&E Inspection Report 50-155, 82-07, in an effort to close open item 50-155/82-07-02. Submit results decayed back to March 8, 1979, for air particulate A-64.

If you or your staff have any questions regarding this matter, please contact Al Januska at 312/932-2500.

Sincerely,

C. J. Paperiello, Chief  
Emergency Preparedness and  
Program Support Branch
