

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

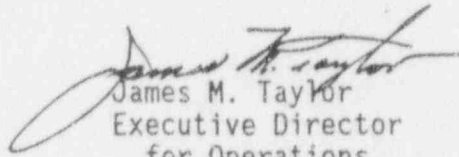

WASHINGTON, D. C. 20555-0001

August 6, 1993

NOTICE TO NONPROFIT EDUCATIONAL INSTITUTION LICENSEES

You should have recently received billing from the NRC with regard to the 1993 annual fee for nonprofit education institution licensees. The following are options available to you regarding this billing:

- (1) If you intend to file an exemption request for annual fees, this must be submitted by November 17, 1993. The Commission expects to approve shortly the pertinent considerations that should be addressed in exemption requests and will provide this guidance via direct mailing or notice in the Federal Register. No interest or penalties will accrue with regard to your 1993 annual fee until 30 days after the Commission acts on your exemption request. If you are unable to pay the 1993 annual fee by the due date prescribed in the billing, we will waive interest and penalty charges if an exemption request is submitted by November 17, 1993. If you pay the 1993 annual fee by the date specified in the billing and subsequently receive NRC approval of an exemption, your 1993 annual fee will be refunded.
- (2) If you decide to relinquish your license(s), certificate(s), registration(s), or obtain a Possession Only License (POL), you will avoid the 1993 annual fee if you file for termination or POL by August 19, 1993. Based on concerns expressed regarding this date for filing for a termination or POL request, the Commission is extending the termination request deadline for those licensees who request an exemption from fees. Nonprofit educational institutions will have 30 days after the Commission has rendered a decision on any exemption request to file a request for termination.
- (3) If you choose not to request an exemption, termination, or POL the 1993 annual fee is due and payable by the date specified in the recent NRC billing.
