

JUN 4 1982

Docket Nos. 50-387; 50-388

Pennsylvania Power and Light Company
ATTN: Mr. J. T. Kaufman
Executive Vice President
Operations
2 North Ninth Street
Allentown, Pennsylvania 18101

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP)

On June 1, 1982, the NRC Region I SALP Board reviewed and evaluated the performance of activities associated with the Susquehanna Steam Electric Station, Units 1 and 2. The results of that assessment are documented in Enclosure (1). A meeting has been scheduled for June 17, 1982 at the site to discuss the assessment. That meeting is intended to provide a forum for candid discussions about your performance. A proposed meeting agenda is attached as Enclosure (2).

At the meeting, you should be particularly prepared to address the review of your preoperational test program by an outside consultant, the closeout status of your startup work list, your management of the interface between the site and your corporate organization, and the electrical distribution undervoltage problem. Also, any comments you may have regarding our report may be discussed.

Please inform us in writing, within twenty days after our SALP meeting, of those actions that you have taken or will take to improve your performance. Additionally, you may include any comments you may have regarding the SALP report.

After we receive your response, we will place it, the enclosed report, and a summary of our findings and planned actions in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,

Original Signed By:
Richard W. Starostecki, SALP Board
Chairman
(Director, Division of Project and
Resident Programs)
