Gentlemen:

RESPONSE TO GENERIC LETTER 89-10, SUPPLEMENT 3
HOPE CREEK GENERATING STATION
DOCKET NO. 50-354

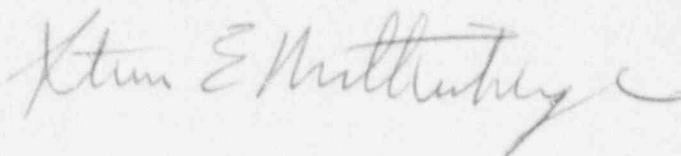

In accordance with the provisions of 10CFR50.54(f), Public Service Electric and Gas Company hereby provides the following 30-day response to Supplement 3 of NRC Generic Letter 89-10 which we received on November 9, 1990.

A plant-specific safety assessment report for Hope Creek has been prepared and is available on site for staff review.

Based on the information provided to date, we do not believe that there are MOVs with deficiencies of greater safety significance than the HPCI, RCIC, and RWCU MOVs described in this supplement.

Completion of our assessment for applicability of the NRC-sponsored MOV test results is pending issuance of the forthcoming EPRI report. Salient information that we will be looking for includes stroke times, internal dimensions and clearances, as well as disk and guide surface material properties.

Sincerely,
