RE: License No. 20-28252-01

Dear Sir or Madam:

By means of this letter, PB Diagnostic Systems, Inc. requests the following amendment to its Material License No. 20-28252-01:

We wish to add use and storage until transport for disposal of up to a maximum of 10 mCi of any chemical and/or physical form of Co-57 to our Material License.

Use of Co-57 will be limited to the use of purchased in vitro diagnostic radioimmunoassay kits containing microcurie quantities of Co-57 labelled analyte. These kits will be used at PB Diagnostics for the research and development of in vitro diagnostic fluorescent enzyme immunnassays.

Training, facilities and equipment, and our radiation safety program remain as described in our material license application dated July 8, 1988 and succeeding amendments. Safety and handling procedures for Co-57 will be as described for I-125 except for waste disposal procedures. All Co-57 waste will be held separately and will be stored until transported from our facility for disposal as described in our material license application.

Per 10 CFR 170.31, 3.M., the amendment fee of \$120 is enclosed.

Should you have any questions, or need further information, please contact me at 617-320-3145.

Sincerely,

Deborah B. Grabbe
