Reference: Letter NA 93-0196, dated October 21, 1993, from  
R. C. Hagan, WCNOG, to U. S. Nuclear Regulatory  
Commission  
Subject: Docket No. 50-482: Request for Additional Time to  
Implement Qualified Reviewer Program Requirements  
Associated to Proposed Changes to Technical  
Specifications 6.8.2b and 6.8.2d.

Gentlemen:

This letter requests a change to the implementation time associated to the referenced license amendment request. The proposed changes to Technical Specifications 6.8.2b and 6.8.2d were submitted in the reference. In that submittal Wolf Creek Nuclear Operating Corporation (WCNOG) requested that, "...the effective date for the change be 90 days after NRC issuance of the amendment to allow for implementation and distribution of procedures governing the Qualified Reviewer Program." Since that submittal, WCNOG has reevaluated the implementation requirements. As a result of this evaluation, WCNOG requests that the effective date for the change be modified to 120 days after NRC issuance of the amendment. This is additional time will allow for complete and thorough implementation. This information was discussed with Mr. W. D. Reckley, NRC Project Manager, on April 4, 1994.

If you have any questions concerning this matter, please contact me at (316) 364-8831, extension 4553, or Mr. Kevin J. Moles at extension 4565.

Very truly yours,

Robert C. Hagan
