SUBJECT: NRC INSPECTION REPORT 50-382/94-01

This refers to the inspection conducted by Ryan Lantz of this office and others as listed in the enclosed report on February 28 through March 4, 1994. The inspection included an assessment of the qualifications of nine individuals who had applied for licenses to operate your Waterford, Unit 3, facility. At the conclusion of the inspection, findings of generic significance were discussed with you and those members of your staff identified in the enclosed report. Appropriate licenses have been issued to seven applicants, who successfully completed all portions of their examinations.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of evaluation of license applicants by the use of written examinations, dynamic simulations, selected job related tasks, and oral questioning in accordance with NUREG-1021, "Operator Licensing Examiner Standards," Revision 7. The results of this inspection are documented on pages 1-2, in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Thomas P. Gwynn, Director
Division of Reactor Safety
