Re: Nine Mile Point Unit 2
Docket No. 50-410
NPF-69

Gentlemen:

On September 21, 1990, Niagara Mohawk submitted an Application for Amendment to the Nine Mile Point Unit 2 Operating License NPF-69. This application contained proposed revisions to the Administrative Controls Section of the Technical Specifications to reflect management changes due to the reorganization of Niagara Mohawk's Nuclear Division and to provide consistency with the standard technical specifications (NUREG-0123).

As requested by Staff, attached is a revised Technical Specification page 6-7 which replaces page 6-7 of our September 21, 1990 Application. The revised page correctly reflects the title of Manager Radiation Protection in Section 6.3, Facility Staff Qualifications.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

C. D. Terry
Vice President
Nuclear Engineering
