Docket Nos. 50-440; 50-441
PROPRIETARY INFORMATION -
NEDE-22203
Reactor Internals Vibration Prototype
Test Program

Dear Mr. Schwencer:

Enclosed is a copy of the General Electric Report, NEDE-22203, "Reactor Internals Vibration Predictions," dated August 1982. This report described the GE reactor internals vibration program and provides peak amplitude predictions based on engineering analysis and prototype test results.

In a letter to you dated September 9, 1982, we provided a draft copy and committed to providing the finalized report in October. With the submittal, we consider this item complete. Please note that this document contains GE proprietary information and we request that it be handled as proprietary in accordance with 10 CFR 2.790. The proprietary nature of this document is demonstrated by the attached affidavit of Glenn G. Sherwood.

If you have any questions, please contact me.

Very truly yours,

Dalwyn R. Davidson
Vice President
System Engineering and Construction
