Perry Nuclear Power Plant
Docket No. 50-440
Generic Letter 89-06
Safety Parameter Display System

Gentlemen:

Generic Letter 89-06 requested our certification that the Perry Safety Parameter Display System (SPDS) meets, or will be modified to meet, the guidelines of NUREG-0737 Supplement 1 while taking into account the information provided in NUREG-1342.

By letter PY-CEI/NRR-1035L dated 7/12/89, it was certified that the Perry SPDS met the NUREG guidance with the exception of a display for drywell hydrogen concentration which was to be provided before startup from the second refueling outage.

By NRC letter dated 5/11/90, the Staff concluded that the Perry SPDS met applicable requirements, provided we add the hydrogen display. This letter confirms that the addition of the SPDS hydrogen display is completed, and that applicable guidelines are now fully satisfied.

If you have any questions, please feel free to call.

Sincerely,

Michael D. Lyster
