

JAN 0 5 1993

National Veterinary Imaging, Inc.
ATTN: Dr. David Feiglin
President and Radiation Safety Officer
10817 Sperry Road
Chesterland, OH 44026

Dear Dr. Feiglin:

Enclosed is your NRC License Number 34-26454-01 in accordance with your request.

Please be advised that Dr. Hamilton has not been added as an authorized user. In order for us to add Dr. Hamilton as an authorized user, resubmit one preceptor form for Dr. Hamilton per preceptor. Note Dr. Hamilton cannot be his own preceptor.

Note your request to transport radioactive animals between locations of use has not been authorized. In order for us to consider this request, respond to the following:

1. Confirm the ambient dose rate will be less than 5 mR/hr at one meter from the animal prior to transport.
2. Submit emergency procedures that vehicle drivers will follow in the event of an accident involving the transported patient.
3. Submit a description of the training program that will be provided to the drivers of the vehicle used for transporting patients. (Note the training should include all items specified in 10 CFR 19.12 as well as instructions for handling spills and other emergencies.)
4. Confirm that radioactive material will not be stored in the vehicle overnight, and that after each day's use, the vehicle will be monitored for contamination.
5. Submit safety measures to be used in transporting radioactive patients (e.g., away from passenger compartment, lead shielding, etc.). Also, confirm a calibrated survey meter will accompany each transport.

You may submit the above as additional information to Control Number 94199 within one year of the date of this letter.

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections," 10 CFR Part 20, "Standards for Protection Against Radiation," and other applicable regulations.
2. Possess radioactive material only in the quantity and form indicated in your license.
3. Use radioactive material only for the purpose(s) indicated in your license.
4. Notify NRC in writing of any change in mailing address.
5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

JAN 05 1993

If you have any questions or require clarification of any of the above stated information, contact us at (708) 790-5625.

Sincerely,

Original Signed By
Robert G. Gattone Jr.
