U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Dear Sirs:

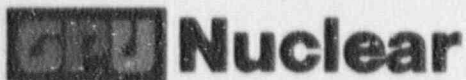

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Updated Final Safety Analysis Report

Pursuant to 10CFR50.71(e), GPUN is forwarding one signed original and 10 copies of the Updated Final Safety Analysis Report, Update #5. Update 5 contains changes made to the facility or procedure changes as previously described in the UFSAR; safety evaluations supporting license amendments or other changes that did not involve an unreviewed safety question; and analyses of new safety issues up through June 30, 1990.

As stated in our correspondence to you dated December 27, 1989, GPU Nuclear recognized that discrepancies existed in the Updated FSAR, and efforts were initiated to upgrade its accuracy. While we have a continuing program to upgrade the FSAR, the enclosed update includes significant improvements particularly in the following areas:

- a) Containment Spray/Emergency Service Water System
- b) Environmental Qualification of Equipment
- c) Control Room Habitability
- d) Seismic Analysis for As-built Safety Related Piping Systems
- e) Organizational Structure
- f) Radioactive Waste Management
- g) Chapter 1-15 Figures

Please note we are transmitting the Oyster Creek FSAR in its entirety and therefore any and all UFSAR documents in your possession must be destroyed. Also, please note even though all pages have "Update 5, 12/90" in the lower right corner, those pages that have changed since the last update are shown by the bar in the right hand margin.

If you have any questions regarding this submittal, please contact Ms. Patty Arcaro at 201-316-7748.

Very truly yours,

E. E. Fitzpatrick
