SUSQUEHANNA STEAM ELECTRIC STATION
GENERIC LETTER 89-10 SUPPLEMENT 3
PLANT SPECIFIC SAFETY ASSESSMENT
PLA-3491 FILES A17, R41-2

Docket Nos. 50-387
and 50-388

Dear Dr. Butler:

A plant specific safety assessment report addressing the factors described in Generic Letter 89-10-Supplement 3 has been completed and is available for staff review. The assessment presents two major conclusions. First, PP&L concludes it is safe to continue operation of the plant under the conditions in supplement 3 to the generic letter for the 12 (six per unit) MOV's identified. Second, a review was performed for applicability of other MOV's to the concerns identified and we concluded there are no additional MOV's which need to be added to the scope of Supplement 3.

PP&L is proceeding with the additional supplement 3 tasks. By March 12, 1991 we will identify any potential design deficiencies, define corrective actions and our implementation schedule.

If you have any questions, please contact J.M. Kenny at (215-774-7904).

Very truly yours,

H. W. Keiser
