Dear Mr. Kinneman;

This is in response to your letter dated June 7, 1990 which was addressed to Patricia Armstrong.

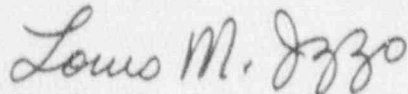

I am pleased to report that the corrective action which was outlined in my January 30, 1990 letter to you has been successfully accomplished and should be considered in full compliance. Currently, there are 6 refrigerators in the hallways of the Given Building and 7 in the adjacent Medical Alumni Building which contain radioactive material. Each refrigerator is labelled with a "Caution Radioactive Material" sign and is locked at all times.

The two documents referred to in my letter dated January 30, 1990 are attached.

Please note that Patricia Armstrong is no longer at the University. Future correspondence should be addressed to Regina White, the new Director of the Office of Sponsored Programs.

Please feel free to contact me if you have any questions.

Sincerely;

Louis M. Izzo, M.S., C.N.M.T. (NMTCB)
Director

I sincerely hope that this plan of action and timetable meets with your approval. It will allow for the most timely and expeditious removal of obstructions in the corridors. We encourage and invite you, and others in the Department, to tour the Given Medical Facility at various intervals to observe our progress. Please let me know if this revised plan meets with your approval as soon as possible as I am actively pursuing serious lease arrangements with significant financial indications.

Thank you again for your advice and counsel.

Sincerely,

Rayburn U. Lavigne
Assistant Vice President
