(617) 738-2191

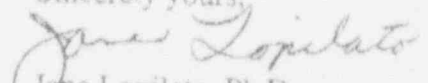

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, DC 20555
ATTN: Docketing and Service Branch

August 18, 1993

Dear Sir or Madam:

The NRC fee for Simmons College, a nonprofit educational institution, is prohibitively expensive. Simmons College is committed to educating and preparing undergraduate women for careers and graduate study in the sciences. A license for radioactive materials is crucial for both teaching and research, especially in the newer fields of molecular biology and neurobiology. To continue to attract both students and faculty, Simmons College must be able to maintain its materials license #20-19717-01. With the new fees, this becomes exceedingly difficult in these fiscally constrained times.

Sincerely yours,

Jane Lopilato, Ph.D.
Assistant Professor of Biology
Radiation Safety Officer
