Subject: Readiness Assessment Report for the PANTHERS-PCC

Attached is the final Readiness Assessment Report for the PANTHERS-PCC test program at SIET. The assessment team concluded that personnel scheduled to be involved in performance of the upcoming PANTHERS-PCC tests are technically capable to conduct the tests in accordance with the test requirements. The team also provided several recommendations which would improve the quality of documentation supporting the tests.

Prior to the initiation of matrix testing in June, GE will conduct a reassessment to ensure that the one open item has been resolved and review whether recommendations have been implemented.

Sincerely,

J. E. Leatherman
Manager, SBWR Design Certification
