

June 6, 1992

MEMORANDUM TO: Files
FROM: D.O. Nellis, RES
SUBJECT: MEETING TO DISCUSS REVISION OF 10 CFR PART 34

A meeting was held in room 5B13, OWFN, to discuss the future direction of the revision of 10 CFR PART 34. Those in attendance were:

Bill Morris, (RES)	Dick Cunningham, (NMSS)
Frank Costanzi (RES)	John Glenn, (NMSS)
Don Cool, (RES)	Mike Lamastra, (NMSS)
Cheryl Trottier, (RES)	Steve Baggett, (NMSS)
Don Nellis, (RES)	Bruce Carrico, (NMSS)
	Scott Moore, (NMSS)

The meeting consisted of a long discussion on the contents of the Issues Paper which led to the conclusion that there was a misunderstanding by all concerned as to the purpose and contents of the paper.

It was proposed that further work be discontinued on the Issues Paper and that we should proceed with developing a proposed rule, using the Issues Paper and its attachments as a basis for the background and statement of considerations of the rule. It was also recommended that we address those issues in the attachments that were not included in the Issues Paper.

Dear Mr. Specter,

The International Union of Operating Engineers is petitioning the U.S. Nuclear Regulatory Commission (NRC) on behalf of its membership, to issue a regulation requiring a minimum of two radiographic personnel when performing Industrial Radiography with licensed material at temporary jobsites. Enclosed is a copy of the petition which the majority of our membership has signed. We believe that we represent the majority of the industrial pipeline radiographers in the United States. Many live in Pennsylvania, one of whom has written you earlier. Enclosed is a copy of that letter with your response and the response of the NRC.

My membership and I would very much appreciate your support in this matter.

Sincerely,

Walter J. Russell
Business Representative
