RE: 10CFR Part 34

Mr. Nellis,

In June of 1993 I addressed a letter to you concerning Grinnell's viewpoint in a mandatory two person crew for field industrial radiography.

Since the recent increase by the NRC in annual licensing fees, the competitiveness of our industry has escalated dramatically. Grinnell Corporation has presented letters to all our current customers, stating that we will operate at all field sites with a mandatory two person crew.

We believe that we are one of the only organizations in New England that has made this commitment regarding a two person crew.

You stated in your letter dated 6/15/93 that 10CFR Part 34 was in the proposal revision states regarding a two person crew.

We would appreciate your input on this situation and exactly when the proposal 10CFR Part 34 will be available for review and comment to the public.

Thank you for your time and consideration. If you have any questions or need further information, please contact me at (401)-941-8000.

Very truly yours,

GRINNELL CORPORATION

William Golini
Radiation Safety Officer
