Re: Application for License to Export Enriched UF6  
for the Genkai Unit No. 4 Region 1, 2 and 3

Dear Ms. B. Wright:

Please find enclosed our application for license to export slightly enriched UF6. This material will be used for the fabrication of fuel assemblies and ultimately loaded into Genkai Unit No. 4 (Region 1, 2 and 3) owned by Kyushu Electric Power Co., Inc.

The contract for the uranium enriching services with the U.S. Department of Energy is DE-SC05-91UE07205.

Please note that the feed material is supplied by Australia, *Canada + U.S.A.* \*

The relevant enriched UF6 will be delivered to the U.S. D.O.E. Portsmouth Enrichment Plant in Piketon, Ohio. After being exported to Japan, it will be converted to UO2 powder, pelletized and fabricated into fuel assemblies by Mitsubishi Nuclear Fuel Co., Ltd.

As to the validity of the export license, we wish to have a two year period from the date of issuance.

With regard to sampling, we request that Two(2) P-10 tube samples be taken from each parent cylinder. These samples should be delivered to Mitsubishi International Corporation c/o Teledyne Brown Engineering Environmental services for indendent analysis. We also request that E.R. Johnson Associates witness the weighing, sampling and loading operation.

Thank you for your attention to the <sup>INTL SAFEGUARDS</sup> above and should you have any questions, please call us at (212) 605-2152.
