SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)
DOCKET NOS. 50-445 and 50-446
OVERSTRESSED PLATFORM AND SUPPORT STRUCTURE DESIGN
SDAR: CP-87-127 (SUPPLEMENTAL REPORT)

- Ref: 1) TU Electric Letter logged TXX-88016 from W. G. Council
to NRC dated January 6, 1988
2) TU Electric Letter logged TXX-89356 from William J. Cahill, Jr.,
to NRC dated July 31, 1989
3) TU Electric Letter logged TXX-88176 from W. G. Council
to NRC dated February 5, 1988

Gentlemen:

On January 6, 1988, TU Electric notified the NRC via report logged TXX-88016 (Ref. 1), of a reportable deficiency involving platforms and support structures which may be overstressed. The last report on this issue was logged TXX-89536, dated July 31, 1989 (Ref. 2). The purpose of this supplemental report is to correct an error in the earlier report on this issue, logged TXX-88176 dated February 5, 1988 (Ref. 3).

In TXX-88176, TU Electric stated that "design validation of seismic category I and II steel structures has been completed for Units 1 and 2, and design modifications have been issued to correct installations which do not conform to the revised criteria." The unit designation in the above statement should have read "...Unit 1 and Common..." Corrective actions associated with Unit 2 are scheduled to be completed prior to Unit 2 fuel load.

Sincerely,

William J. Cahill, Jr.

CBC/bm
