Mr. Darrell G. Eisenhut, Director
 Division of Licensing
 Office of Nuclear Reactor Regulation
 U.S. Nuclear Regulatory Commission
 Washington, D.C. 20555

Dear Mr. Eisenhut:

Subject: Oyster Creek Nuclear Generating Station
 Docket No. 50-219
 Control Room Habitability

Reference: P.B. Fiedler to D.G. Eisenhut, letter dated
 October 8, '82
 Control Room Habitability

As discussed with our Project Manager, Mr. Jim Lombardo, on October 18, 1982, we have identified certain discrepancies in our correspondence of October 8, 1982, referenced above. Our cover letter states that final modifications are planned for our Cycle 12 refueling outage. This should have read our Cycle 11 refueling outage. In addition, the drawings referenced on page 2 are enclosed with this correspondence. Our revised response to question (4)(d) "Frequency of hazardous chemical transportation traffic (truck, rail and barge)" is as follows: There is no way to determine the frequency of hazardous chemical transportation traffic within a five mile radius of Oyster Creek. The two major arterials located within the five mile radius are the Garden State Parkway and U.S. Route 9. The New Jersey Department of Environmental Protection reports that there are over 3,000 registered collectors/haulers in New Jersey, any of which could travel past the plant at any given time. No advance notice to the plant is required before such a shipment from an offsite source is made.

Should you have any further questions on this subject, please contact Mr. Michael Laggart, Oyster Creek Licensing Manager, at (609) 971-4643.

A001

Very truly yours,

Aggr Dist.
