Docket No. 50-461

Illinois Power Company  
ATTN: John Cook  
Vice President  
Clinton Power Station  
Mail Code V-275  
P. O. Box 678  
Clinton, IL 61727

Dear Mr. Cook:

SUBJECT: REACTIVE PHYSICAL SECURITY INSPECTION AT CLINTON

This refers to the reactive inspection conducted by T. J. Madeda of this office on April 19-20, 1994. The inspection included a specific review of security concerns relative to the effectiveness of the personnel search program authorized for the Clinton Nuclear Power Plant. At the conclusion of the inspection, the findings were discussed with Mr. R. Morgenstern and other members of your staff identified in the enclosed report.

No violations of NRC requirements were identified during the course of this inspection.

Although search requirements were met, we noted that some security managers could have taken corrective action earlier. The action was taken, but only after a second problem occurred. Security managers identified discrepancies between actual search practices and written procedures, but corrected the discrepancies only after the same problem was again identified.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observation of activities in progress.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
