

DEC 12 1990

Docket No. 50-266
Docket No. 50-301

Wisconsin Electric Power Company
ATTN: Mr. C. W. F.
Vice President,
Nuclear Power
231 West Michigan Street - P379
Milwaukee, WI 53201

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. M. P. Huber and J. F. Smith of this office on November 26-30, 1990, of activities at the Point Beach Nuclear Plant, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-24 and No. DPR-27 and to the discussion of our findings with Mr. J. Reisenbuechler and others of your staff at the conclusion of the inspection. The inspection was conducted to review the Inservice Testing program implementation and the status of your program to address NRC Bulletin 88-04 regarding the potential for safety-related pump loss.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements as discussed in Paragraph 3.e. of the enclosed report. Our review of current practices of the facility identified that corrective actions for the issue had already been taken. Further, the issue was judged to be a Severity Level V violation, therefore, in accordance with our Enforcement Policy, a Notice of Violation is being issued.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

ORIGINAL SIGNED BY GEOFFREY G. WRIGHT (jar)
Mark A. Ring, Chief
Engineering Branch
