

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION I  
475 ALLENDALE ROAD  
KING OF PRUSSIA, PENNSYLVANIA 19406

OCT 11 1990

MEMORANDUM FOR: David Lange, Acting Chief, Operator Licensing Branch  
Division of Licensee Performance  
and Quality Evaluation, NRR

FROM: Lee Bettenhausen, Chief  
Operations Branch, Division of Reactor Safety

SUBJECT: REVISION TO NATIONAL EXAMINATION SCHEDULE FOR THE HOPE  
CREEK AND SHOREHAM PLANTS

The Hope Creek Generating Station is currently assigned the months of March and September for the administration of licensing examinations per the National Examination Schedule (Generic Letter (GL) Nos. 89-17 and 90-07). Hope Creek normally administers their requalification examinations during the month of June and has requested an exchange of dates with the Shoreham Nuclear Power Station.

Shoreham is currently assigned the months of June and December. Due to the status of the Shoreham facility, this exchange would not adversely affect the administration of licensing examinations at Shoreham. This exchange was discussed with Shoreham personnel and they are willing to exchange examination months with Hope Creek.

The licensee has requested this change by their response, dated September 10, 1990 to GL No. 90-07. In light of the above agreements, Region I recommends approval of the licensee's request.

This change should go into effect June 1991. The concurrence by your office is requested. We will inform the licensee of your concurrence by separate correspondence. The National Examination Schedule published next summer (1991) should reflect this change. Please contact R. Conte at (FTS) 346-5210.

Lee H. Bettenhausen, Chief  
Operations Branch  
Division of Reactor Safety
