NPDES Permit Number PA0025615 Renewal

SUBJECT: BVPS No. 1 and No. 2
Docket No. 50-334
License DPR-66

Dear Sir:

As required by Appendix B to Facility Operating License No. NPD-764, Beaver Valley Power Station, Unit 2 Environmental Protection Plan (Nonradiological), enclosed is a copy of NPDES Permit PA0025615, renewed and issued on September 27, 1990. Please be advised that an appeal to the Environmental Hearing Board was registered on October 26, 1990 by Duquesne Light Company on behalf of Beaver Valley Power Station. No date has been set for the hearing therefore we began implementing the new permit on November 1, 1990.

Very truly yours,

A. M. Dulick
Chemistry Manager

RE: NPDES Permit PA0025615
Beaver Valley Power Station
Shippingport Borough
Beaver County

Gentlemen:

Your NPDES permit is enclosed. Please study it carefully, and if you have any questions, please contact me.

EPA will be sending you computer generated, preprinted Discharge Monitoring Report (DMR) forms for your submittals. In the event that these forms are not received, use the Department's DMR forms. The Department will be forwarding DMR forms within two weeks. Should you find significant discrepancies between the two versions, contact this office and use the attached form until the preprinted forms are corrected. Do not allow a problem with the preprinted forms to cause your failure to submit these reports in a timely manner as this will result in violations of your permit.

The Department has addressed your comments in the Addendum to the Fact Sheet, a copy of which is enclosed.

Sincerely,

Karen Milcic
Sanitary Engineer
