South Texas Project (STP), Units 1 and 2

Operating License Nos: NPF-76

NPF-80

During an NRC inspection conducted November 5-9, 1990, a deviation of your Safety Evaluation Report (SER) was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Action," 10 CFR Part 2, Appendix C (1990), the deviation is listed below:

Section 13.1.2.2.1 of the STP Updated Final Safety Analysis Report (UFSAR) states "The administrative aide is responsible for tasks of an administrative nature which are required during his shift. The aide performs routine administrative duties and processes such as routing records, logs and correspondence for the control room operations staff as required. The aide reports to the shift supervisor."

Section 13.5.1.1 of the STP SER (NUREG-0781) states, in part, "Each shift will have administrative aides to relieve the shift supervisor of routine administrative duties and to process and route various records, logs and correspondence."

Contrary to the above, the November 1990 Administrative Aide Shift Scheduling Report for Unit 2, which was signed by the Unit 2 Operations Manager on October 25, 1990, and implemented November 1, 1990, did not provide an administrative aide on the first Saturday shift or for any of the Sunday shifts during the month.

Please provide to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555, with a copy to the Regional Administrator, Region IV, and if applicable, a copy to the NRC Resident Inspector, in writing within 30 days to the date of this Notice, the reasons for the deviation, the corrective steps which have been taken and the results achieved, the corrective steps which will be taken to avoid further deviations, and the date when your corrective action will be completed. Where good cause is shown, consideration will be given to extending the response time.
