

JUL 15 1982

Docket Nos. 50-277; 50-278

Philadelphia Electric Company
 ATTN: Mr. S. L. Daltroff
 Vice President
 Electric Production
 2301 Market Street
 Philadelphia, Pennsylvania 19101

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP)

On July 12, 1982, the NRC Region I SALP Board reviewed and evaluated the performance of activities associated with the Peach Bottom Atomic Power Station, Units 2 and 3. The results of that assessment are documented in Enclosure (1). A meeting has been scheduled for July 27, 1982 at your corporate offices to discuss the assessment. That meeting is intended to provide a forum for candid discussions about your performance.

At the meeting, you should be particularly prepared to address radiological controls and fire protection/housekeeping. Also, any comments you may have regarding our report may be discussed.

Please inform us in writing, within 20 days after our SALP meeting, of those actions you have taken or will take to improve your performance. Additionally, you may include any comments you may have regarding the SALP report.

After we receive your response, we will place it, the enclosed report, and a summary of our findings and planned actions in the NRC Public Document Room.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

Richard W. Starostecki, Director
 Division of Project and Resident
 Programs
