Docket No. 50-312

Mr. J. W. Mattimoe
Assistant General Manager and
Chief Engineer
Sacramento Municipal Utility District
6201 S Street
P. O. Box 15830
Sacramento, California 95813

Dear Mr. Mattimoe:

SUBJECT: UPGRADED SRO AND RO TRAINING AND TRAINING FOR MITIGATING
CORE DAMAGE

Science Applications, Inc., under contract to the NRC has prepared the enclosed Technical Evaluation Report (TER) for the subject NUREG Item Nos. I.A.2.1 and II.B.4 for the Rancho Seco Nuclear Generating Station. We have reviewed the conclusions from the TER and find that training programs that you have implemented for these NUREG Items to be acceptable. As such, we consider these NUREG Items to be resolved. However, for task Item II.B.4, future changes to the facilities, such as installation of additional instrumentation to detect conditions of inadequate core cooling, should be reflected in updates to the training program. Changes to the training program that are made specifically to address facility changes need not be reported to the NRC.

Sincerely,

ORIGINAL SIGNED BY

JOHN F. STOLZ

John F. Stolz, Chief
Operating Reactors Branch #4
Division of Licensing
