On November 11, 1990, TVA submitted a letter confirming TVA had implemented I.E. Bulletin 80-06, ESF Reset Circuitry, and TMI Item II.E.4.7.1-4, Containment Isolation Dependability. The letter contained a typographical error. TMI Item II.E.4.2.1-4 was incorrectly depicted as II.E.4.7.1-4. As requested by the NRC staff, TVA is reissuing the notification.

TVA is hereby notifying NRC that I.E. Bulletin 80-06, ESF Reset Circuitry, and TMI Item II.E.4.2.1-4, Containment Isolation Dependability, has been implemented at BFN Unit 2. The design has been finalized, modifications completed, and the Post Modifications Testing completed with no deficiencies or exceptions noted. Please update the Safety Issues Management System data base to show this item being implemented as of the date of this letter.

If you have any questions on this matter, please call Patrick P. Carrier, BFN, (205) 729-3566.

Very truly yours,
