DEC 20 1990

MEMORANDUM FOR: To File

FROM: Robert A. Hasse, Chief, Technical Support Staff,
Division of Reactor Projects

SUBJECT: REGION III LICENSEES NOT REQUIRING TEMPORARY
INSTRUCTION (TI) 2515/79, "EMERGENCY OPERATING
PROCEDURES (EOP)" INSPECTION

This memorandum is to clarify data in the SIMS database regarding why not all Region III sites were inspected in accordance with TI 2515/79. TI 2515/79 was to be performed after NRR approval (via SER) of the licensees procedure generation package (PGP) for preparing EOPs. TI 2515/79 was canceled by Inspection Manual Change Notice 88-16. At that time, only six PGPs had been approved by NRR for Region III plants. Inspections at these plants were completed. TI 2515/79 was subsequently superseded by TI 2515/92. Three plants remain to be inspected under this TI.

Robert A. Hasse, Chief,
Technical Support Staff,
Division of Reactor
Projects
