Gentlemen:

Subject: Inspection Report No. 50-29/90-82

A routine safety inspection and observation of your annual emergency preparedness exercise was conducted by Mr. C. Amato and others of this office on September 24-28, 1990 at the Yankee Nuclear Power Station, Rowe, Massachusetts. Mr. Amato discussed our findings with your staff at the conclusion of the inspections.

Areas examined during this inspection included observation of your annual exercise, follow-up of previously identified inspection findings, and a routine safety inspection of your emergency preparedness program. Within these areas, the inspection consisted of selected examination of procedures and representative records, interviews with personnel and observation of the emergency exercise by team members.

Within the scope of this inspection, no violations were identified. The NRC exercise observation team determined that the emergency response actions by the Yankee staff during the exercise demonstrated the ability to provide adequate protective measures for the health and safety of the public.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,
