Mr. J. R. Miller, Chief  
Technical Inspection Branch,  
Region III  
U. S. NUCLEAR REGULATORY COMMISSION  
799 Roosevelt Road  
Glen Ellyn, Illinois 60137

Dear Mr. Miller:

DOCKET NOS. 50-266 AND 50-301  
REPLY TO IE INSPECTION REPORT NOS.  
50-266/82-19 AND 50-301/82-19  
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

This is in response to your September 20, 1982 letter regarding the routine safeguards inspection conducted by Messrs. J. Belanger and J. Knicely of your office on August 9-13, 1982.

As you indicate in your report, certain activities appeared to be in noncompliance with NRC requirements. Items 1, 2, 3, and 5a were corrected prior to the completion of the inspection and no reply to these items is required.

Regarding Items 4 and 5b, a written response is addressed in the enclosure to this letter, including the corrective action taken, corrective steps to be taken to avoid further items of noncompliance, and dates when full compliance will be achieved.

Your report also identified two concerns relating to personnel access controls to the protected area and maintenance of security-related equipment. During the exit interview, the licensee satisfactorily identified corrective actions regarding your concerns. The actions will be available for your review on future inspections.

The subject matter of the enclosure to this letter is considered exempt from disclosure in accordance with the provisions of 10 CFR Parts 2, 50, 70, and 73. We request that the enclosure to this letter be treated as confidential and not be placed in any public document room, and that any reply you make be similarly withheld if it deals with the details of our plant security plan.

Very truly yours,

A handwritten signature in cursive script, appearing to read "Sol Burstein". The signature is written in dark ink and is positioned above the typed name.

Executive Vice President
