Dr. Paul S. Shewmon, Chairman
Advisory Committee on Reactor Safeguards
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Dr. Shewmon:

SUBJECT: OYSTER CREEK NUCLEAR GENERATING STATION - DRAFT (NUREG-0822)
INTEGRATED PLANT SAFETY ASSESSMENT REPORT

Enclosed for review by the Committee are twenty (20) copies of the Draft Integrated Plant Safety Assessment Report for the Oyster Creek Nuclear Generating Station, which is owned by Jersey Central Power and Light Company and is operated by GPU Nuclear Corporation. The report documents our review completed under the Systematic Evaluation Program.

The review has provided for (1) an assessment of how this plant compares with current licensing safety requirements relating to selected issues, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety. Equipment and procedural changes have been identified as a result of the review. It is expected that this report will be one of the bases in considering the issuance of a full-term operating license in place of the existing provisional operating license.

Sincerely,

Frank Miraglia, Assistant Director
for Safety Assessment
Division of Licensing
