Docket No. 030-31072

License No. 37-28367-01

Professional Quality Testing Co.  
ATTN: Mr. John C. Chabal  
Vice President  
1370 Old Freeport Road  
Pittsburgh, Pennsylvania 15238

Gentlemen:

Subject: Inspection No. 030-31072/90-001

This refers to your letter dated July 31, 1990, in response to our letter dated July 18, 1990.

Thank you for informing us of the corrective and preventive actions documented in your letter. These actions will be examined during a future inspection of your licensed program.

However, your corrective action in regard to Item 1 is inadequate. As discussed in a telephone conversation between you and Mr. R. H. Ladun of this staff on October 29, 1990 you must either:

1. Abide by Section 6.2(g) of your Personnel Operating and Emergency Procedures which requires that radioisotopes devices be returned to a radiographic storage vault when operations are complete; or
2. Seek an amendment to your license which reflects storage inside a locked camper bed which is attached to a utility trailer.

If you so desire to choose the latter option, you must provide assurance that the requirements of 10 CFR 20.207(a) are met. Specifically, you must describe how the trailer will be made immobile when parked and you must describe the location where parked (i.e. inside or outside of the owner controlled area).

We understand that until this item can be resolved you are storing the isotope in the locked camper, inside a locked steel box. To provide assurance that the requirements of 10 CFR 20.207(a) are being met, the trailer will be parked inside a locked area under your control and will be made immobile. If your understanding is different from ours, please notify us by telephone immediately.

You are required to respond to this letter in writing, and in preparing your response you should follow the instructions in Appendix A.
