Dear Mr. Burstein:

This is in response to your letter dated September 15, 1982 concerning the Electric Power Research Institute's (EPRI's) standardized light water reactor design program. In that letter you requested that we provide resources to complement the industry's commitment to the initial phase of your program.

I believe that early NRC involvement in a program such as you have outlined will prove beneficial to both of our organizations and will enhance the role of standardization in nuclear power plant design. Accordingly, I will be the lead individual for matters of NRC policy and resource commitments. In addition, I have designated Mr. Frank J. Miraglia, Assistant Director for Safety Assessment and Mr. Cecil O. Thomas, Acting Chief, Standardization & Special Projects Branch, as the individuals to help define the scope, outstanding issues, and schedules for a review of standard reactor designs.

We can meet with you and your representatives as soon as practicable. The objective of that meeting should be to provide us with a better understanding of the details of your program. That understanding will enable us to more definitively plan to meet your needs. To arrange that meeting, please contact Cecil Thomas on (301) 492-7130.

Sincerely,

Original Signed by
 H. R. Denton

Dear Mr. Burstein:

This is in response to your letter dated September 15, 1982 concerning the Electric Power Research Institute's (EPRI's) standardized light water reactor design program. In that letter, you reiterate your request that we provide resources to complement the industry's commitment to the initial phase of your program. You also suggest that our resources should include levels of participation appropriate to deal with both policy and program matters.

I believe that our involvement in a program such as you have outlined will prove beneficial to both of our organizations and will enhance the role of standardization in nuclear power plant design. Accordingly, I have designated Mr. Darrell G. Eisenhut, Director, Division of Licensing, as the lead individual within the Office of Nuclear Reactor Regulation for policy matters related to your program. In addition, I have designated Mr. Frank J. Miraglia, Assistant Director for Safety Assessment and Mr. Cecil O. Thomas, Acting Chief, Standardization & Special Projects Branch, as the individuals to deal with program matters.

I recommend that you and your representatives meet with the above-named individuals as soon as practicable. The objective of that meeting should be to provide us with a better understanding the details of your program. That understanding will enable us to more definitively plan to meet your needs. To arrange that meeting, please contact Cecil Thomas on (301) 492-7130.

Sincerely,

Harold R. Denton, Director
 Office of Nuclear Reactor Regulation
