COMMENTS:

I approve the staff's recommendation to issue NUREG-1150 in final form subject to the following:

- 1) The ACRS letter report of November 15, 1990 concerning the final version of NUREG-1150 provides valuable additional perspective on the strengths and limitations of NUREG-1150 analyses and could be of considerable benefit to potential users of NUREG-1150 results. Accordingly, the ACRS letter report and staff responses to those ACRS comments concerning the strengths and limitations of NUREG-1150 should be provided as an additional Appendix to NUREG-1150. Prior to publication, this addition to NUREG-1150 should be submitted to the Commission for information.
- 2) The staff should submit responses to the remainder of the ACRS comments to the Commission for information. I am particularly interested in hearing the staff's views on the matters raised in section 5.5 of the ACRS letter. Publication of NUREG-1150 need not await formulation of these responses.
