ENCLOSURE 1

OCT 5 1982

MEMORANDUM FOR: Region III File

FROM: Dorwin R. Hunter, Chief, Section 1 - Zimmer,
Office of Special Cases

SUBJECT: ZIMMER MEETING ON SEPTEMBER 27, 1982 AND
CONFERENCE CALL ON SEPTEMBER 30, 1982

Meeting

A meeting was held at 10:00 a.m. on September 27, 1982, at the Region III office at the request of Cincinnati Gas and Electric Company (CG&E) to discuss proposed organization changes and other general items concerning the Zimmer project. The meeting was between E. A. Borgmann and members of his staff and J. G. Keppler and members of his staff. Mr. L. L. Kintner of NRR was also in attendance. The organization changes proposed by CG&E realigned the groups reporting to the Executive Vice President (Mr. Borgmann) and the Vice President - Nuclear (Mr. Sylvia).

The proposed changes included splitting the QCP away from QA creating two groups, making QA a more manageable task, and elevating both QA and the QCP to the level of the Engineering and Construction Departments. The proposal called for all four to report to the Executive Vice President. As proposed, the Vice President - Nuclear would manage Plant Operation, Preoperational and Startup Testing, Licensing, and Nuclear Services.

The NRC was concerned that the proposed organization might be perceived to emphasize completion of construction and startup and operation and not emphasize the importance and independence of QA/QC and the QCP.

The licensee agreed to consider the NRC concerns and to rethink their position on the proposed organizational changes.

The status of the QA Manual for Construction was discussed including the method the licensee would utilize to update the necessary documents. This item was to be reviewed by the NRC to determine the necessary actions required by the licensee.

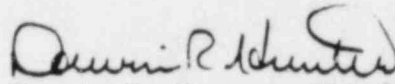

OCT 5 1982

Additional items discussed included the adequacy of the construction deficiency reports (50.55(e)s), the consideration of a computer program for establishing the history and adequacy of welds, the recent death of the Catalytic, Inc. labor foreman as a result of an altercation on site, and the recently issued "Demand for Information".

Conference Call

A conference call was conducted at 9:00 a.m. on September 30, 1982, between NRC staff members and CG&E staff members to discuss the need and method available to update the licensee QA Plan for construction contained in the PSAR (1971), and to provide the QA Plan for construction and operation to the NRC for review as appropriate. Further discussions will be held between the NRC and the licensee to establish a firm schedule for completion of the reviews. The initial discussions are planned during the week of October 4, 1982, with the completion of the CG&E reviews and submitted plan during the next few weeks.

The meeting and conference call will be documented in the Zimmer monthly inspection report.

E. A. BORGMANN
SENIOR VICE PRESIDENT

Docket No. 50-358

September 24, 1982

Mr. Harold Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

RE: WM. H. ZIMMER NUCLEAR POWER STATION -
UNIT 1 - FUEL LOAD DATE

Dear Mr. Denton:

Based upon an assessment of existing circumstances, we believe that a reasonable target date for loading fuel at the Wm. H. Zimmer Nuclear Power Station is the third quarter of 1983.

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY

By 
E. A. BORGMANN
