Docket No. 50-373

Commonwealth Edison Company
Attn: Mr. Louis O. DelGeorge
Director of Nuclear Licensing
P. O. Box 767
Chicago, Illinois 60690

Gentlemen:

By letter dated July 15, 1982, the Division of Licensing (DL) staff completed the review of your application dated July 14, 1982, and issued Amendment No. 3 to Facility Operating License No. NPF-11 for LaSalle County Station - Unit 1. This application proposed an additional license condition for checking the torque on all non-pressure boundary bolts on each safety-related valve located outside containment. Fees pursuant to 10 CFR 170.22 were not remitted with your application because you determined (in a July 15, 1982 letter) that no fee is required since it was requested by the USNRC.

Based on information provided by the DL staff as the result of their final review of your application, it has been determined that a Class II fee (\$1,200) is appropriate for the July 14 application since the review was administrative or pro forma in nature. Although the application was requested by the USNRC, it is not exempt from fees under the provisions of Footnote 2. When applications such as this one are requested by the USNRC for the purpose of enhancing the safe operation of a nuclear facility or to correct a problem or potential problem relating to operation of a facility, they are not exempt under Footnote 2 unless specifically ordered pursuant to 10 CFR 2.204. Therefore, your Company is requested to remit the sum of \$1,200 to this office.

Sincerely,

Original Signed by:
Reba M. Diggs
