Docket No. 50-219

Mr. P. B. Fiedler, Vice President and Director
 Oyster Creek Nuclear Generating Station
 Post Office Box 388
 Forked River, New Jersey 08731

Dear Mr. Fiedler:

SUBJECT: OYSTER CREEK NUCLEAR GENERATING STATION - DRAFT (NUREG-0822)
 INTEGRATED PLANT SAFETY ASSESSMENT REPORT

A copy of our Draft Report, NUREG-0822, the Integrated Plant Safety Assessment Report, for the Oyster Creek Nuclear Generating Station is enclosed. The report documents our review completed under the Systematic Evaluation Program.

The review has provided for (1) an assessment of how this plant compares with current licensing safety requirements relating to selected issues, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety. Equipment and procedural changes have been identified as a result of the review. It is expected that this report will be one of the bases in considering the issuance of a full-term operating license in place of the existing provisional operating license.

Also enclosed is a related Notice of Availability which has been forwarded to the Office of the Federal Register for publication.

Sincerely,

Dennis M. Crutchfield, Chief
 Operating Reactors Branch #5
 Division of Licensing
