

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-219JERSEY CENTRAL POWER AND LIGHT COMPANY ANDGPU NUCLEAR CORPORATIONSYSTEMATIC EVALUATION PROGRAMNOTICE OF AVAILABILITY OF DRAFT INTEGRATED PLANT SAFETY ASSESSMENT REPORT

The Nuclear Regulatory Commission's (NRC) Office of Nuclear Reactor Regulation (NRR) has published its Draft Integrated Plant Safety Assessment Report related to Oyster Creek Nuclear Generating Station located in Ocean County, New Jersey.

The report documents the review completed under the Systematic Evaluation Program (SEP). The SEP was initiated by the NRC to review the design of older operating nuclear reactor plants to reconfirm and document their safety. The review has provided for (1) an assessment of the significance of differences between current technical positions on safety issues and those that existed when the Oyster Creek plant was licensed, (2) a basis for deciding on how these differences should be resolved in an integrated plant review, and (3) a documented evaluation of plant safety. Equipment and procedural changes have been identified as a result of the review. It is expected that this report will be one of the bases in considering the conversion of the provisional operating license to a full-term operating license.

The report is being referred to the Advisory Committee on Reactor Safeguards and is being made available at the NRC's Public Document Room, 1717 H Street, N.W., Washington, D. C. 20555 and at 101 Washington Street,

- 2 -

Toms River, New Jersey 08753 for inspection and copying. Single copies of this report (Document No. NUREG-0822) may be requested from the U. S. Nuclear Regulatory Commission, Director, Division of Technical Information and Document Control, Washington, D. C. 20555, Attention: Publications Unit.

Dated at Bethesda, Maryland, this 30th day of September, 1982.

FOR THE NUCLEAR REGULATORY COMMISSION

  
Dennis M. Crutchfield, Chief  
Operating Reactors Branch #5  
Division of Licensing
