WASHINGTON, D. C. 20555

December 20, 1989

*Don't - I have
called Ashok to
for our support -
M/12/21*

MEMORANDUM FOR: Ashok Thadani, Director
Division of Systems Technology

FROM: James H. Sniezek, Deputy Director
Office of Nuclear Reactor Regulation

SUBJECT: MCGUIRE TECHNICAL SPECIFICATIONS CONCERNS

Over a year ago I was informed that a number of concerns that had been raised by Mr. Licciardo regarding McGuire Tech Specs had not yet been resolved. It is my understanding that a number of Branches in DOE, DST, and DRP have given some attention to these concerns, albeit at low priority, based on judgments regarding safety significance of the issues. In view of the elapsed time, I have decided to assign you the responsibility to discuss with me the status of the review by all involved NRR Divisions, and for you to propose a plan for timely closure of these issues. Please be prepared to discuss this matter with me in one week.

James H. Sniezek

James H. Sniezek, Deputy Director
Office of Nuclear Reactor Regulation
