

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

August 8, 1990

NOTE FOR: David B. Matthews, Projects Director (9H-3)  
Project Directorate II-3  
Division of Reactor Projects - I/II

FROM: Robert C. Jones, Chief  
Reactor Systems Branch  
Division of Systems Technology

SUBJECT: RESOLUTION OF PLANT-SPECIFIC DPO ISSUES CONCERNING MCGUIRE  
TECHNICAL SPECIFICATIONS (REVISED)

- References:
1. Memorandum from Ashok C. Thadani to Steven A. Varga, "Resolution of Plant-Specific DPO Issues Concerning McGuire Technical Specification," dated May 14, 1990.
  2. Memorandum from R. A. Licciardo to Steven A. Varga, "Comments on Resolution of Plant-Specific DPO Issues Concerning McGuire Technical Specifications," dated June 19, 1990.

Plant-Specific DPO Issues

SRXB has reviewed R. Licciardo's comments on the resolution of plant-specific issues concerning McGuire Technical Specifications. We conclude that his comments have no safety concern. A few issues need further clarification to close the DPO review. R. Licciardo's comments are categorized as follows:

- (1) Plant-specific DPO issues resolution - 8 issues have no comment  
(Questions: 6a, 7d, 7i, 7k, 7l, 7n, 1a, 7m)
- (2) Plant-specific DPO issues resolution - 13 issues do not challenge the resolution  
(Questions: 15, 4a/4b, 1e, 6b, 7c/7h, 7e, 7j, 7o, 11a, 11b, 11c)
- (3) Plant-specific DPO issues resolution - 9 issues challenge the resolution but have no merit  
(Questions: 1, 1b, 1c, 7b/7g, 9, 13, 14, 18)

PDR

- (4) Plant-specific DPO issues resolution - 9 issues require additional clarification  
(Questions - 4c, 1d, 2, 3, 7a/7f, 12a, 12b, 17)
- (5) Plant-specific DPO issues resolution - Raised 2 new issues  
(Questions: 5a, 6c)

We have revised our original report issues (Reference 1) as appropriate to include further clarification to R. Licciardo's comments. We have responded to his 2 new issues in this report. Tables 1-3 list categories of 41 plant-specific issues. Enclosures 1-3 provide our final resolution of the plant-specific issues.

#### R. Licciardo's Comments on Original 160 Plant-Specific Issues

<u>Issue</u>	<u>Response</u>
Adequacy of LCO for RCS while in MODE 5 with loops not filled	Specific DPO concerns addressed with GL 88-17 and Generic DPO resolution for Question 8e
Original 160 issues should be re-reviewed in light of Diablo Canyon and Vogtle events	No basis for reevaluation: - Concerns in original DPO regarding mid-loop operation have been addressed;  - Original 160 issues did not include concerns regarding station blackout

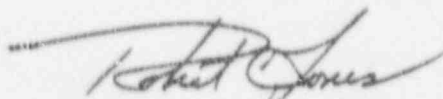

#### Generic Issues

OTSB has resolved generic issues as listed in Tables 4/5 of the original report (Reference 1) and provided their input to projects.

David B. Matthews

- 3 -

We consider that McGuire Technical Specifications DPO review is complete and the DPO review is closed.

Robert C. Jones, Chief  
Reactor Systems Branch  
Division of Systems Technology
