Gentlemen:

SUBJECT: NOTICE OF VIOLATION (NRC INSPECTION REPORT 50-313/90-39;
50-368/90-39)

This refers to the inspection conducted by Mr. R. E. Baer of this office on October 29 through November 2, 1990. The inspection included a review of activities authorized for your Arkansas Nuclear One, Units 1 and 2 facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). We are concerned about the violations because of the inappropriate health physics practices that were demonstrated and the potential for overexposure to an individual.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
