Director of Nuclear Reactor Regulation Attention: Ms. E. Adensam, Chief Licensing Branch No. 4 Division of Licensing U.S. Nuclear Regulatory Commission Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of) Docket Nos. 50-327 Tennessee Valley Authority) 50-328

Enclosed is the Sequoyah Nuclear Plant Unit 1 Inservice Inspection Program (SQN SI-114.1, Rev. 0). The initial draft of "Preservice Baseline Inspection and Inservice Inspection Program" for the Sequoyah Nuclear Plant was submitted by letter from J. E. Gilleland to S. A. Varga dated August 23, 1977. Subsequent revisions and updates have been submitted to the NRC to respond to NKC questions. As requested by the April 14, 1980 letter from Charles E. Murphy to H. G. Parris, additional changes resulting from implementation of the inservice inspection program will be submitted if necessary.

The inservice and inspection program, SI-114.1, is applicable for our Sequoyah Nuclear Plant unit 1 only and outlines the requirements for performing the first 10-year interval inservice mondestructive examinations for ASME Code Class 1, 2, and 3 components containing water, steam, or radioactive material. The inservice and inspection program is based on the 1977 Edition and Summer 1978 Addenda of Section XI of the ASME Boiler and Pressure Vessel Code A.

If you have any questions concerning this matter, please get in touch with J. E. Wills at FTS 858-2683.

Very cruly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager Nuclear Licensing
