

DKN: 03014708

OCT 29 1982

Department of the Army  
Commanding Officer  
Crane Ammunition Activity  
Crane, Indiana 47522

License No. 13-18235-01

Gentlemen:

This refers to the routine safety inspection conducted by Mr. D. R. Gibbons of this office on October 15, 1982, of activities authorized by NRC Byproduct Material License No. 13-18235-01 and to the discussion of our findings with Mr. Dale L. Groh at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated October 22, 1981, regarding apparent items of non-compliance found during our September 15-16, 1981, inspection. We have no further questions regarding these matters.

No items of noncompliance with NRC requirements were identified during the course of this inspection.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. J. Sreniawski, Chief  
Materials Radiation Protection  
Section 2
