WASHINGTON, D. C. 20555

December 20, 1990

Docket No. 50-344

Mr. James E. Cross
Vice President, Nuclear
Portland General Electric Company
121 S.W. Salmon Street
Portland, Oregon 97204

Dear Mr. Cross:

SUBJECT: SECOND TEN-YEAR INTERVAL INSERVICE INSPECTION PROGRAM PLAN FOR
TROJAN NUCLEAR PLANT (TAC NO. 63974)

By letters dated November 14, 1986, October 7, 1988, September 29, 1989, January 17, and March 9, 1990, Portland General Electric Company submitted to the NRC the Second Ten-year Interval Inservice Inspection Program, Plan, Revisions, and responses to requests for additional information for review and evaluation for the Trojan Nuclear Plant. The Program was submitted for review and evaluation of its compliance with the requirements of the 1983 Edition through Summer 1983 Addenda of Section XI of the ASME Boiler and Pressure Vessel Code, regulations, and plant Technical Specifications.

The NRC Staff, with technical assistance from the Idaho National Engineering Laboratory, has reviewed and evaluated the program, additional information provided, and the requests for relief from some Section XI requirements that the licensee determined to be impractical to perform at the facility. Based on the information submitted, the staff agrees with the contractors conclusions and recommendations presented in the Technical Evaluation Report (TER) attached.

We have determined that the Trojan Nuclear Plant Second Ten-Year Interval Inservice Inspection Program is in compliance with the requirements cited above. We have also determined that certain requirements of the 1983 Edition through Summer 1983 Addenda of Section XI are impractical to perform at the facility and we have granted relief from those requirements. A summary of the requirements and the bases for granting the relief requests are contained in the attached Safety Evaluation Report/Technical Evaluation Report (SER/TER), Attachment 1.

DEF 111

We conclude that the Trojan Nuclear Plant Second Ten-Year Interval Inservice Inspection Program with the additional information provide and the reliefs granted constitute part of the basis for meeting the requirements of 10 CFR 50.55a and Technical Specification 4.0.5.

Sincerely,

original signed by Roby Bevan
