Attention: D. G. Wiedeman, Chief
Materials Radiation Protection
Section I

Dear Sir:

This refers to our notice of violation dated September 23, 1982. A program to satisfy the requirements of 10 CFR 34.28 (b) was started immediately following our inspection of September 13, 1982. We were in the habit of inspecting and when necessary repairing our exposure device but were not recording properly this procedure. These errors have been corrected and the proper procedures will be followed in the future.

Sincerely,

ST. LOUIS STEEL CASTING INC.

Robert A. Marchbanks
