Glen Allen, Virginia 23060

Dear Mr. Stewart:

SUBJECT: NORTH ANNA UNITS 1 AND 2 - RESPONSE TO GENERIC LETTER 89-10,  
"SAFETY-RELATED MOTOR-OPERATED VALVE (MOV) TESTING AND SURVEILLANCE"

On June 28, 1989, the NRC issued Generic Letter (GL) 89-10 requesting the establishment of a program to ensure the operability of all safety-related MOVs under design basis conditions. The program in GL 89-10 significantly expands the scope of the program outlined in NRC Bulletin 85-03 and its supplement.

The schedule provided in the GL requested that a description of your MOV program be available for review by June 28, 1990, or the first refueling outage after December 28, 1989, whichever was later. Information that should be contained in your program description was discussed during the workshops held in September 1989. The staff positions on questions presented during the workshops have been issued in the form of a supplement to the GL. As your program is developed, justification for any differences between your program and the GL exemplified by the workshop comments should be incorporated into your program description.

Your response to GL 89-10 dated December 26, 1989, stated that you intend to meet the schedule and recommendations of the Generic Letter. Your program description should be retained on-site for possible further NRC staff review.

Sincerely,

(Original Signed By)

Leon B. Engle, Project Manager  
Project Directorate II-2  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation
