DECOMMISSIONING FUNDING FOR U.S. NRC LICENSE NO. SMB-1322

Gentlemen:

In accordance with the provisions of Title 10 CFR, Part 40.36, decommissioning funding assurance may be required in connection with the subject license. The purpose of this letter is to inform you we are in the process of disposing of all source material and plan to apply for authorization to terminate the license.

We plan to dispose of the source material at the site operated by Envirocare of Utah, Inc. Envirocare has applied for an amendment to their Utah license allowing them to accept licensed material for disposal. This has resulted in a delay in our disposal plans, however, we expect to be able to dispose of all licensed material in mid-August.

A consultant has been hired to handle disposal details and to conduct surveys and contamination tests after the material is removed. Purchase requisitions have been written to cover the costs of transport, disposal, cleanup and testing. Funding in the amount of \$25,000 has been committed to cover decommissioning costs.

We hope to submit our termination application in about a month.

Sincerely,

M. J. Nardozi
