Mr. Uldis Potapovs, Chief  
Vendor Inspection Branch  
US Nuclear Regulatory Commission  
Office of Inspection and Enforcement  
Region IV  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

Subject: NRC Inspection 82-02 (Additional Information)

Dear Mr. Potapovs:

This is in response to your undated letter received in our office on September 8, 1982. The additional information requested is presented below:

1. Nonconformance E of 82-02

a. NRC Comment

"If the Product Upgrade List (PUL) omissions relate only to verification of source data or references, and if these documents predate September 1, 1980, we have no further questions. If the PUL's in question relate to other needed changes or additions, or they were processed after September 1, 1980, then your corrective actions and preventive measures are requested."

b. B&W-NPGD Response

The PUL's in question were processed for certain new or revised calculations released after September 1, 1980. Their purpose was to identify calculations processed prior to September 1, 1980, which were referenced as source data in the new or revised calculations so that the referenced calculations could be reviewed at a later date for proper identification of their source data. As stated in our June 23, 1982 letter, we do not believe that this review of "old" calculations is necessary or of any benefit.

2. Nonconformance F of 82-02

a. NRC Comment

"If, as you state, the Calculation Package Source Reference Program Tracking Report has replaced the use of the PUL for identifying the need for verification of input sources, when will the calculation packages (processed since September 1, 1980) be brought into conformance with input source verification requirements?"

b. B&W-NPGD Response

The purpose of neither the Calculation Package Source Reference Program Tracking Report nor the PUL was to identify the need for verification of input sources for calculation packages processed since September 1, 1980. Their purpose was as stated above.

Sincerely,

D. E. Guilbert  
Vice President and General Manager  
Nuclear Power Generation Division
